

Radiator Guard Installation Instructions

Model : KTM 4 Stroke (Excluding 250 EXC-F FA-001-KT-05)
Year : 2002-07
Part No: FA-001-KT-02

1. Remove the seat, fuel tank and plastic radiator guards. Remove the 3 radiator mounting screws from each radiator.
2. Fit the rear support to the frame as shown in figure 1.

Figure 1.

3. Fit the radiator guards. The two retaining bolts can be tightened using a 10mm T-bar, socket or spanner as shown in figures 2-4.

Figure 2.

Figure 3.

Figure 4.

4. Using a 10mm spanner or socket, fit the 2 M6 screws to the support at the rear of the radiator as per figure 5.

Figure 5.

5. Refit the fuel tank and seat.
