

Radiator Guard Installation Instructions

Model: KTM 85 SX
Husqvarna TC 85

Year: 2013+
Year: 2014+

Part No: FA-001-KT-12

Tools required:
6mm T-bar, 8mm T-bar, 4mm Allen Key

1. Remove the following by removing the necessary bolts:
 - Seat
 - Fairings
 - Plastic radiator louvers.

2. Remove the two mounting bolts on the front of each radiator and fit the radiator guard as shown.

Leave bolts loose until the bracket is located on the radiator lug. Tighten using Loctite once located correctly

3. Refit the shrouds making sure the 16mm bolt passes through the shrouds, alloy bracket and then into the radiator thread. The supplied washers will need to be used on the bolt that mounts the radiator guard and fairing to the radiator.
4. Refit the seat using the original bolt.
