

## Radiator Guard Installation Instructions

**Model :** Yamaha WR250F  
**Year :** 2001-06  
**Part No:** FA-001-YA-01

### Adjustment

The width of the guards is adjustable depending on the model. To adjust the guard, loosen the bolts on the face of the guard then remove the hex head bolt on the side of the guard to add/remove the 5mm spacers.

Model	Spacers
WR250F 2001-2004	2
WR250F 2005-2006	0

1. Remove the radiator shrouds and plastic radiator guards. Remove the 3 mounting bolts for each radiator.
2. Fit the rear support to the frame. Leave bolt loose.
3. Fit the radiator guards. The M6 bolts can be tightened with either a 10mm T-bar or socket.
4. Fit the M6 screws to the supports at the rear of the radiators. Tighten all screws on the brace.
5. Refit the radiator shrouds.
