

Radiator Guard Installation Instructions

Model : Yamaha YZ250 (2 stroke)
Year : 2002-16
Part No: FA-001-YA-06

1. Remove the radiator shrouds and plastic radiator guards. Remove the 3 mounting bolts from each radiator.
2. Fit the rear radiator braces using the M6 x 30 bolts provided leaving the bolts slightly loose.
3. Fit the radiator guards using a 10mm T bar.
4. Bolt the guards to the two rear braces using the M6 x 12 bolts and washers provided.
5. Tighten the mounting bolt for the rear brace.
6. Loosen the hose clamp on the radiator hose attached to the top of the radiator (shown in the figure below) and rotate the hose such that it doesn't interfere with the radiator guard braces, and retighten the hose clamp.

7. Refit the radiator shrouds.
