

Model: Yamaha YZ250F
Part No: FA-001-YA-13

Year: 2010-

Tools required:
8mm T-bar, 10mm T-bar

1. Remove the seat and fairings by removing the bolts circled in figure 1.

Figure 1: Mounting bolts for the seat and fairings

2. Remove the rear radiator mounting bolt on each side (Figure 2a).
3. Fit the brace using the rear radiator mount bolt, as shown in figure 2a. Tighten the bolt as required to line up the other bolt holes.
4. Refit the fairings using the supplied bolts where necessary. (Figure 2b)
5. If the rear radiator is not tight already, tighten it after fitting the fairings.

Figure 2: Fitting the brace and refitting of fairings (From left to right; a & b)

6. Refit the seat.
